

## Sanitizing Champion

Responsible for cleaning and sanitizing equipment used by their team or group during the softball activity. It is also recommended that teams clean bases, and if fenced, the gates and latches leading into and out of the playing area prior to beginning the softball activity.

This includes balls, that should be disinfected frequently during the activity. This can be done by spraying with disinfectant and rubbing with the cloth or by spraying disinfectant on the cloth and rubbing down individually.

If bats are shared, they must be wiped down between users.

Once a team or group's organized activity has ended, that group or team must clean and sanitize the area used, including gates, latches and field equipment, including, but not limited to bases, pitching machines, tees and/or nets, and dugouts and equipment storage areas if used.

The Team Sanitizing Champion will be responsible for bringing the Sanitizing Bucket to each team event and also emailing <mailto:operationslfa@gmail.com> if any refills are required.

### Sanitizing Bucket Contents:

Team Hand Sanitizer

Spectator Hand Sanitizer

Refill bottle of Hand Sanitizer

5 masks and 5 pairs of gloves for First-Aid

2 rags for cleaning balls, with disinfectant.
